

APBEN 2022

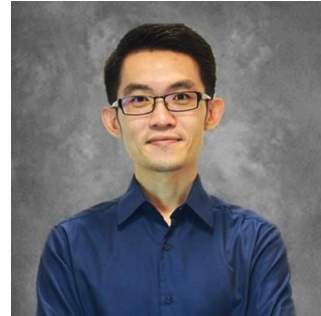

The New Norm of **Professionalism** and **Bioethics** and Beyond
21-22 May 2022

Workshop Panelist

COVID-19 Vaccination

Hong Wai THAM

Leader of the Biopharmaceutical Research Unit and
Senior Lecturer,
SEGi University, Malaysia

BIOGRAPHY

Dr. Tham is a virologist and obtained his PhD from Monash University Malaysia where he specialized in crosstalks between Dengue virus and mosquitoes, specifically looking into its protein-protein interactions. He is currently a senior lecturer at SEGi University, leading the Biopharmaceutical Research Unit, where the research unit is devoted to advancing innovative medical research, and reinforce collaboration in fulfilling biopharmaceutical research and development. Some of his research projects includes development and validation of spectrophotometric methods for estimation of selected active pharmaceutical ingredients in bulk and formulations, flavonoid screening and antimicrobial property of Sabah snake grass and expression of Zika virus envelope protein (domain III) for virus-mosquito interaction studies.
